

AICTE OIBSIP Internship Workflow

TIPS & TRICK

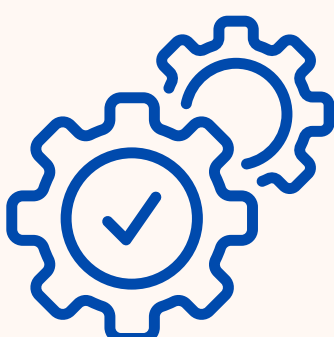

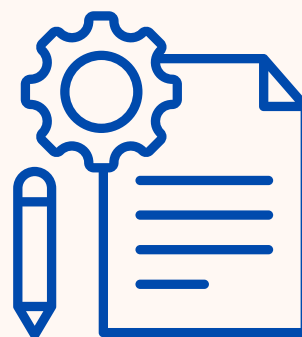

Project Orientation:

Upon receiving the welcome email, review project details in the welcome email (Task List) to grasp the project's objectives and requirements.

Development Kickoff:

Initiate development by starting the coding process based on identified tasks, ensuring a solid foundation for project implementation.

GitHub Deployment:

Deploy the developed project on GitHub to establish version control and enable collaborative efforts among team members.

Demo Video Showcase:

Develop a compelling demo video highlighting key features and functionality of the project.

Share and Recognition

Boost visibility by sharing project demo on LinkedIn. Conclude internship with careful project submission and receive recognition certificate upon completion.
